

MADE IN JAPAN

使用简单 效果出色 橡胶磨头

The Best Convenient tool! Rubber grinding stone.

最高使用转速
Maximum rotation speed
10,000rpm

六角轴 橡胶磨头

Hex chuck Rubber grinding stone

六角轴径

适用机器
Tool

各式电钻
Impact driver

用途 Application

研削，研磨，焊接烧痕处理，除锈，电镀痕迹处理及去毛刺。
Grinding, Polishing, Removing burns, rust and plating, De-burring and others.

特点 Features

- 追求橡胶磨头前所未有的效果和性能。
 - 本磨头可适用于电钻或可夹持六角柄之任何旋转设备。
 - 去除毛刺后不会产生二次毛刺。
 - 高耐用性：减少了研磨粉尘，更提高了耐用性，更加经济。
- Pursuit the ease of fitting into the workpiece due to elasticity of rubber.
 - Can be used with impact driver.
 - No appearance of second-burrs after burring.
 - Economical because of high durability.

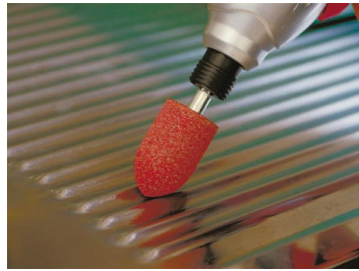

延用对象 Materials

规格型号 Specification

样式 shape	(单位: mm) (Unit:mm)	轴径 shank diameter	型 号 / Item No.		
			红色 Red #80	青色 Blue #120	绿色 Green #220
 A号 shape A	φD ℓ	20 - 40 - 6.35	18045	18046	18047
 O号 shape O	φD ℓ	20 - 40 - 6.35	18051	18052	18053
 C号 shape C	φD1 φD2 ℓ	13(D1) - 40 - 6.35 20(D2)	18057	18058	18059

应用例 Example of use

⚠ 危险性 (使用上的注意事项) / Dangerous

橡胶弹性与一般弹性大不相同，其特征在于它会根据负荷而变形并且变形量会很大。如果像一般的磨头或切削工具那样使用的话，则会非常危险。请严格遵守最高使用回转数这个限制条件。请不要擦超出这个负荷。

Rubber elasticity is very different from general elasticity, which is characterized by deformation according to the load as well as a high amount of deformation. Therefore, handling the Daiwa Rabin as a general grinding stone and cutting tool can be very dangerous. Operate your devices at the speed less than the maximum r.p.m. Take care not to apply too much load.

什么是弹性橡胶磨头「Daiwa Rabin」 An elastic rubberized grinding stone "Daiwa Rabin" is ...

特征 / Features

- 「易切割，易研磨」橡胶磨头... 这正是 Daiwa Rabin 的特征。
"Cut, Polish" This is feature of Daiwa Rabin
- 间断，耐久性差... 等等橡胶磨头的缺点已被解决，这正是 Daiwa Rabin 的优异性能。
Clogging, Durability... Overcome weakness of rubber stone due to excellent performance of Daiwa Rabin
- 超过 18000 种，匹配不同工作场景・作业内容的品类
Items over 18,000 according to work piece and operation details
- 深受来自世界上 30 多个国家的用户的信赖。
Used in more than 30 countries, which is a sign of trust
