

March 18, 2026

Dear Valued Customers,

Notice of Discontinuation:
 α -Rabin Ceramics, R-Ceramic and Daiwa Stick Ceramic

We would like to express our sincere gratitude for your continued support and patronage. We regret to inform you that we will be discontinuing the sale of the products listed below. Due to shifts in global supply and demand, the price of blue ceramic alumina - the primary raw material used in these products - has continued to rise sharply. Consequently, it has become increasingly difficult for us to offer these products at a competitive price. We apologize for any inconvenience this may cause and appreciate your understanding of these circumstances. We look forward to continuing to serve you with our Daiwa Rabin products.

Discontinuation Details

Affected Products: α -Rabin Ceramics, R-Ceramic and Daiwa Stick Ceramic

Final Order Date: June 30, 2026

Notes:

- 1) Please be advised that we will stop accepting requests for new quotations as of this notice.
- 2) ***Sales for α -Rabin (WA grain) and Daiwa Stick RM99Z (WA grain) will continue as usual.***

Should you have any questions or concerns regarding this notice, please contact your local sales representative.

Sincerely,

Daiwa Rabin Co., Ltd.

2-1-8 Inari, Soka-shi, Saitama 340-0003, Japan

α -Rabin / α -Rabin Ceramics

NEW

α -Rabin

ϕ 100 ~ ϕ 255
255 - 20 - 25.4 etc.

α -Rabin Ceramics

ϕ 100 ~ ϕ 205
205 - 25 - 25.4
205 - 25 - 50 etc.

Rubber grinding stone for various grinders and machining centers! • Excellent grinding power
• Improvement in durability

Product advantages of α -Rabin

- α -Rabin is a hard grinding stone uniquely developed by our company.
Rubber design that allows continuous processing without dressing.
- Structure that also maintains the advantages of conventional rubber grinding stone by suppressing the rubber elasticity, while solving the difficulty of setting the machine.
- Excellent grinding power is the greatest feature

Product advantages of α -Rabin Ceramics

- α -Rabin Ceramics uses our independently developed and patented ceramic abrasive grain
- It has good regeneration of grains and can polish without burns
- Structure that allows extending life (product life) than conventional hard grinding stone

Product name	Size (mm) ※Please inquire about the size.	
α -Rabin	ϕ 100 ~ ϕ 255 , 255-20-25.4 etc.	
	Abrasive grain type	Grit
	WA	# 80 , # 120

Product name	Size (mm) ※Please inquire about the size.	
α -Rabin Ceramics	ϕ 100 ~ ϕ 205 , 205-25-25.4 , 205-25-50 etc.	
	Abrasive grain type	Grit
	Ceramics	#120 , # 180 , # 220

■ Precautions for using the rubber grinding stone safely and correctly

Elasticity of rubber greatly differs from general elasticity. It deforms according to the load and the amount of deformation is large. It is very dangerous if used in the same manner as general grinding stones and cutting tools.

•Make sure to observe the maximum allowable rotation speed for use. •Attach the grinding stone to the grinder or other device correctly. •Before starting work, check the external appearance of the grinding stone for cracks, ruptures or chips. Rotate it safely and slowly to see if there is any vibration or abnormality. •Do not apply load quickly because the rubber has elasticity. •Some sparks may be generated on the dust. Install a shielding plate or dust protection equipment and provide adequate ventilation. •During work, wear protective equipment such as dust masks, safety glasses, protective gloves and safety shoes. •Store the product in a well-ventilated, cool and dark place. Avoiding direct sunlight, ultraviolet rays, radioactive rays, ozone, high temperature and high humidity.

※The color of the product on this leaflet may slightly differ from the actual ones. Design, specification, appearance etc. of the product may be changed without prior announcement.

Please feel free to contact us for any further questions.
